Oral Sessions, Tuesday-Friday

Overview schedule of the oral sessions S1-S10 and the corresponding lecture halls E1-2, E31, E36, D1-3, and D31. Time for ordinary oral presentations is 12' + 3' for discussion and change of speaker/room.

		E1	E2	E31	E36	D1	D2	D3	D31
S1	**Tuesday 10:30-12:00**	Global modes and vortex instabilities	Biomedical flows I	Instabilities of rotating flows	Large Eddy Simulations	Geophysical flows I	Multiphase flows I	Wall bounded turbulence I	Transition to turbulence
S2	**Tuesday 14:30-15:30**	Instabilities and global modes	*No session*	Compressible boundary layers	Numerical techniques and simulations I	Geophysical flows II	Multiphase flows II	Turbulence I	Experimental methods I
S3	**Tuesday 16:00-17:30**	Boundary layer transition	Biomedical flows II	Hydrodynamic instabilities I	Capillary flows I	Geophysical flows III	Multiphase flows III	Turbulent transport	Vortex dynamics I
S4	**Wednesday 10:30-12:00**	Mini-symposium: *New developments in hydrodynamic stability* organized by D. Henningson	Mini-symposium: *Vehicle aerodynamics* organized by A. Talamelli	Multiphase flows IV	Capillary flows II	Mini-symposium: *Microfluidics* organized by C. Baroud	*No session*	Turbulence II	Experimental methods II
S5	**Wednesday 13:30-15:30**			Multiphase flows V	Geophysical flows IV		Turbulence with rotation	Wall bounded turbulence II	Vortex dynamics II
S6	**Wednesday 16:00-17:30**			Multiphase flows VI	Numerical techniques and simulations II		Bubbles & drops	Turbulent jets	Vortex dynamics III
S7	**Thursday 10:30-12:00**	Streamwise structures in boundary layers	Mini-symposium: *Swirling flows* organized by H. Andersson M. Braza	Couette and Poiseuille flows	Fluid structures and interactions	Mini-symposium: Two phase Flows organized by D. Lohse	Control I	Turbulence III	Compressible flows
S8	**Thursday 13:30-15:30**	Hydrodynamic instabilities II		Hydrodynamic instabilities III	Hydrodynamic instabilities IV		Control II	Non-Newtonian fluids	Laminar flows
S9	**Thursday 16:00-17:30**	Hydrodynamic instabilities V		Pipe flows	Numerical techniques and simulations III		Microfluidics I	Turbulent diffusion	Vortex dynamics IV
S10	**Friday 10:30-12:00**	Wake instabilities	*No session*	Hydrodynamic Instabilities VI	Numerical techniques and simulations IV	Multiphase flows VII	Microfluidics II	Turbulence IV	Reactive flows
